Index of Subjects

VOLUME 76, 1990

(Abstracts from Society Proceedings are not included)

Acoustic noise and sleep modifications, 29
Active movement, *see* Voluntary movement
Adaptative filter and P300 in a go-no go task, 249
Adolescence
– EEG and EP in Crigler-Najjar syndrome, 473
Age
– EEG changes during hypothermic surgery, 268
– reliability of EEG in senile dementia, 400
Alpha blocking and frequency changing, 197
Alpha sleep pattern
– periodicity analysis of sleep EEG, 222
Alzheimer's disease, reliability of EEG, 400
Ambulatory monitoring of sleep in physicians, 193
Amygdala kindling and carbamazepine in cats, 63
Anesthesia
– enflurane anesthesia, EEG and heart rate, 476
Antidromic conduction velocity
– diagnosis of carpal tunnel syndrome, 142
Antiepileptic drugs
– carbamazepine and amygdala kindling in cats, 63
Arousal
– periodicity analysis of sleep EEG, 222
Artifact elimination technique, 557
Asymmetries of EEG
– qEEG in patients with intracranial tumors, 13
Attention
– event-related perturbation in 40 Hz SSR, 148
Auditory evoked potentials
– event-related perturbation in 40 Hz SSR, 148
– representation of multichannel evoked P300, 540
Automatic seizure detection, 317
Autonomic functions in normal subjects, 258
Autoregressive model
– EEG before generalized spike-wave complexes, 205

BAEPs, *see* Brain-stem auditory evoked potentials
Bilateral synchrony of epileptiform discharges, 520
Bimanual coordination brain mechanisms, 282
Blink reflexes electrically and mechanically elicited, 39
Body movement
– development of sleep, and brain-stem maturation, 325
Book reviews, 90, 277, 376, 562
Boundary potentials, 187
Brain-stem
– basic mechanisms of rhythmic activities, 481
– development of sleep, and brain-stem maturation, 325
Brain-stem auditory evoked potentials
– in Crigler-Najjar syndrome, 473
Bronchopulmonary dysplasia in children, 106

Carbamazepine and amygdala kindling in cats, 63
Cardiac rate response
– event-related perturbation in 40 Hz SSR, 148
Cardiac surgery
– EEG changes during hypothermic surgery, 268
Carpal tunnel syndrome diagnosis, 142
Cat amygdala kindling and carbamazepine, 63
Chick
– peripheral origin vestibular potentials, 362
Children, *see* Infants
Cingulate cortex kindling, 177
Clinical
– clinical EEG in suspected encephalopathies, 86
– clinical relevance of kindling, 459
– utility of long latency cognitive ERPs, 1, 2, 6
Cognition
– clinical utility of long latency ERPs, 1, 2, 6
Computed EEG topography, *see* Topographic mapping
Contingent negative variation
– functional brain topography of mental work, 339
– of direction and force movement preparation, 47
Cortex
– basic mechanisms of rhythmic activities, 481
– brain mechanisms of voluntary motor commands, 282
– magnetic field of cortical current sources, 73
Corticospinal tract
– brain mechanisms of voluntary motor commands, 282
– corticospinal projections in man, 509
Current dipole or source, *see* Generators
Cyclic alternating pattern
– sleep modifications induced by increasing noise, 29

0013-4649/90/$03.50 © 1990 Elsevier Scientific Publishers Ireland, Ltd.

Dementia
– clinical utility of long latency cognitive ERPs, 1, 2, 6
– reliability of EEG in senile dementia, 400
Depth recording
– spike detection with subdural electrodes, 379
Development
– development of sleep, and brain-stem maturation, 325
– electrically and mechanically elicited blink reflexes, 39
Diagnosis
– clinical EEG in suspected encephalopathies, 86
– diagnosis of carpal tunnel syndrome, 142
– reliability of EEG in senile dementia, 400
Digital technique for stimulus artifact reduction, 557
Dissociation index
– development of sleep, and brain-stem maturation, 325
Dreaming
– EPs during REM sleep reflect dreaming, 19

EcoG
– spike detection with subdural electrodes, 379
EEG
– basic mechanisms of rhythmic activities, 481
– before generalized spike-wave complexes, 205
– bronchopulmonary dysplasia in children, 106
– carbamazepine and amygdala kindling in cats, 63
– changes during hypothermic surgery, 268
– CNV of direction and force movement preparation, 47
– during spontaneous alpha blocking, 197
– enflurane anesthesia, EEG and heart rate, 476
– evaluation of slow brain potentials, 413
– in Crigler-Najjar syndrome, 473
– influence of REM sleep pressure on non-REM sleep, 114
– in suspected encephalopathies, 86
– intracerebral source localization for FFT power maps, 271
– linked ears reference and EEG topographic mapping, 373
– magnetic detection of sleep spindles, 123
– periodicity analysis of sleep EEG, 222
– reliability of EEG in senile dementia, 400
– qEEG in patients with intracranial tumors, 13
– spindles, *see* Spindles
– triphasic waves in hypothermia, 370
Electrical stimulation
– technique for stimulus artifact reduction, 557
Electric field
– magnetic coil stimulation, relevance to SNAP, 131
EMG
– a basic posture control mechanism, 165
– diagnosis of carpal tunnel syndrome, 142
– ring finger stimulation in CTS electrodiagnosis, 142
Encephalopathy
– clinical EEG in suspected encephalopathies, 86
– triphasic waves in hypothermia, 370
Enflurane anesthesia, EEG and heart rate, 476
Epilepsy
– automatic seizure detection, 317
– carbamazepine and amygdala kindling in cats, 63
– clinical relevance of kindling, 459
– do epileptic foci in children migrate?, 95, 96, 100
– EEG before generalized spike-wave complexes, 205
– interhemispheric transfer of epileptiform discharges, 520
– intracranial topography of P3 ERP, 235
– kindling in the cingulate cortex, 177
– spike detection with subdural electrodes, 379
Eric Kugelberg lecture, 280, 282
Event-related potentials
– and short-term memory and retention, 419
– clinical utility of long latency cognitive ERPs, 1, 2, 6
– effects of practice on P300 in a go-no go task, 249
– endogenous ERPs from sphenoidal electrodes, 331
– event-related perturbation in 40 Hz SSR, 148
– functional brain topography of mental work, 339
– intracranial topography of P3 ERP, 235
– peripheral origin of chick's vestibular EPs, 362
– representation of multichannel evoked P300, 540
Experimental models, *see* Models
Eye movement
– EPs during REM sleep reflect dreaming, 19
– eye movement patterns in REM sleep, 388

Far-field potentials
– stationary boundary potentials, 187
Fast Fourier transform power maps
– intracerebral source localization, 271
Fatigue
– functional brain topography of mental work, 339
Forebrain commissures
– interhemispheric transfer of epileptiform discharges, 520
Frequency analysis, *see* Spectral analysis
Functional explorations of the human epileptic brain, 296

GABA inhibitory effects on monkey VEP, 440
Galvanic response in normal subjects, 258
Generators
– CNV of direction and force movement preparation, 47
– inhibitory effects on monkey VEP, 440
– intracerebral source localization for FFT power maps, 271
– intracranial topography of P3 ERP, 235
– magnetic field of cortical current sources, 73
– peripheral origin of chick's vestibular potentials, 362
– representation of multichannel evoked P300, 540
Genetics
– EEG and EP in Crigler-Najjar syndrome, 473
Go and no-go task
– effects of practice on P300, 249

Hans Berger lecture, 295, 296
Heart rate and enflurane anesthesia, 476
Heart surgery, *see* Cardiac surgery
Hereditary disorders, *see* Genetics
Hippocampus
– interhemispheric transfer of epileptiform discharges, 520
Hypothermia
– EEG changes during hypothermic surgery, 268
– triphasic waves in hypothermia, 370

Imaging
– functional explorations of the human epileptic brain, 296
Infants
– bronchopulmonary dysplasia in children, 106
– development of sleep, and brain-stem maturation, 325
– do epileptic foci in children migrate?, 95, 96, 100
– EEG changes during hypothermic surgery, 268
– electrically and mechanically elicited blink reflexes, 39
Inhibitory effects on monkey VEP, 440
Insomnia, *see* Sleep
Interhemispheric transfer of epileptiform discharges, 520
Interictal spike detection with subdural electrodes, 379
Intracranial tumors and qEEG, 13
Irregular low voltage activity
– spontaneous alpha blocking, 197

Joint receptors
– a basic posture control mechanism, 165

Kindling phenomenon
– and carbamazepine in cats, 63
– clinical relevance, 459
– in the cingulate cortex, 177

Lambda waves during REM sleep reflect dreaming, 19
Laminar analysis
– inhibitory effects on monkey VEP, 440
Laplacian operator
– functional brain topography of mental work, 339
Localization
– do epileptic foci in children migrate?, 95, 96, 100
– intracerebral source for FFT power maps, 271
– magnetic field of cortical current sources, 73

Magnetic stimulation
– corticospinal projections in man, 509
– magnetic coil stimulation, relevance to SNAP, 131
Magnetoencephalogram
– magnetic detection of sleep spindles, 123
– magnetic field of cortical current sources, 73
Mapping, *see* Topographic mapping
Maturation
– bronchopulmonary dysplasia in children, 106
– development of sleep, and brain-stem maturation, 325
– *see also* Mental retardation
Median nerve
– diagnosis of carpal tunnel syndrome, 142
– magnetic coil stimulation, relevance to SNAP, 131
– SEPs in healthy newborns, 453
Memory
– ERPs and short-term memory and retention, 419
Mental work functional brain topography, 339
Mental retardation
– EEG and EP in Crigler-Najjar syndrome, 473
Method of evaluation of slow brain potentials, 413
Models
– EEG before generalized spike-wave complexes, 205
– frequency changing during spontaneous alpha blocking, 197
– magnetic coil stimulation, relevance to SNAP, 131
– magnetic field of cortical current sources, 73
– stationary boundary potentials, 187
Monitoring
– automatic seizure detection, 317
– EEG changes during hypothermic surgery, 268
– endogenous ERPs from sphenoidal electodes, 331
– spike detection with subdural electrodes, 379
Monkey VEP and inhibitory effects, 440
Motor action potentials
– magnetic coil stimulation, relevance to SNAP, 131
Motor cortex
– corticospinal projections in man, 509
Motor preparation, *see* Preparation to movement
Movement
– brain mechanisms of voluntary motor commands, 282
– eye movement, *see* Eye movement
– voluntary vs. involuntary motor acts, 351
– *see also* Preparation to movement
Multiple unit activity
– inhibitory effects on monkey VEP, 440
Muscle
– corticospinal projections in man, 509
– technique for stimulus artifact reduction, 557

Neonates
– electrically and mechanically elicited blink reflexes, 39
– SEPs in healthy newborns, 453
– *see also* Prematures
Neurovegetative control
– enflurane anesthesia, EEG and heart rate, 476
Newborns, *see* Neonates
Night work and sleep in physicians, 193
Normal human subjects
– a basic posture control mechanism, 165
– CNV of direction and force movement preparation, 47
– corticospinal projections in man, 509
– electrically and mechanically elicited blink reflexes, 39
– EPs during REM sleep reflect dreaming, 19
– ERPs and short-term memory and retention, 419
– evaluation of slow brain potentials, 413
– event-related perturbation in 40 Hz SSR, 148
– eye movement patterns in REM sleep, 388
– frequency changing during spontaneous alpha blocking, 197
– functional brain topography of mental work, 339
– influence of REM sleep pressure on non-REM sleep, 114
– magnetic detection of sleep spindles, 123
– representation of multichannel evoked P300, 540
– sleep modifications induced by increasing noise, 29
– sympathetic skin response in normal subjects, 258
N2
– intracranial topography of P3 ERP, 235

On-call duty
– sleep in physicians, 193

Pattern reversal
– EEG and EP in Crigler-Najjar syndrome, 473
Periodicity analysis of sleep EEG, 222
PGO waves
– EPs during REM sleep reflect dreaming, 19
Posture
– a basic posture control mechanism, 165
Power spectral analysis
– influence of REM sleep pressure on non-REM sleep, 114
– intracerebral source localization for FFT power maps, 271
Premature
– bronchopulmonary dysplasia in children, 106
– development of sleep, and brain-stem maturation, 325
Premotor cortex
– voluntary vs. involuntary motor acts, 351
Preparation to movement
– CNV of direction and force movement preparation, 47
– voluntary vs. involuntary motor acts, 351
Pressure receptors
– a basic posture control mechanism, 165
Principal component analysis
– representation of multichannel evoked P300, 540
Prognosis
– bronchopulmonary dysplasia in children, 106
Propagated action potentials
– stationary boundary potentials, 187
Pyramidal tract
– brain mechanisms of voluntary motor commands, 282
P3
– ERPs and short-term memory and retention, 419
– intracranial topography of P3 ERP, 235
P300
– clinical utility of long latency cognitive ERPs, 1, 2, 6
– effects of practice on P300 in a go-no go task, 249
– functional brain topography of mental work, 339
– representation of multichannel evoked P300, 540

Quantitative EEG
– carbamazepine and amygdala kindling in cats, 63
– qEEG in patients with intracranial tumors, 13

Rapid eye movements, *see* Eye movement
Rat
– interhemispheric transfer of epileptiform discharges, 520
– kindling in the cingulate cortex, 177
Reaction time
– CNV of direction and force movement preparation, 47
Readiness potentials
– voluntary vs. involuntary motor acts, 351
Recovery cycle
– electrically and mechanically elicited blink reflexes, 39
Reference electrode and EEG topographic mapping, 373
Reflexes
– a basic posture control mechanism, 165
REM sleep, *see* Sleep
Rhythmicity
– basic mechanisms of rhythmic activities, 481
Running mean frequency
– frequency changing during spontaneous alphá blocking, 197

Saccade
– EPs during REM sleep reflect dreaming, 19
Seizure, *see* Epilepsy
Sensory nerve action potentials
– magnetic coil stimulation, relevance to SNAP, 131
Sequential measurement
– reliability of EEG in senile dementia, 400
Shift work and sleep in physicians, 193
Sleep
– development of sleep, and brain-stem maturation, 325
– EPs during REM sleep reflect dreaming, 19
– eye movement patterns in REM sleep, 388
– influence of REM sleep pressure on non-REM sleep, 114
– in physicians, 193
– magnetic detection of sleep spindles, 123
– modifications induced by increasing noise, 29
– periodicity analysis of sleep EEG, 222
Slow brain potential evaluation, 413
Slow waves
– basic mechanisms of rhythmic activities, 481
– ERPs and short-term memory and retention, 419
– intracranial topography of P3 ERP, 235
Society proceedings

– Swedish, Stockholm, November 1989, 23P
Somatosensory evoked potentials in healthy newborns, 453
Source, *see* Generators
Spatial distribution
– magnetic coil stimulation, relevance to SNAP, 131
Spatial resolution
– magnetic field of cortical current sources, 73
Spectral analysis
– EEG changes during hypothermic surgery, 268
Spectral purity index and spontaneous alpha blocking, 197
Sphenoidal
– endogenous ERPs from sphenoidal electrodes, 331
– kindling in the cingulate cortex, 177
Spike-wave
– EEG before generalized spike-wave complexes, 205
Spinal motoneurons
– corticospinal projections in man, 509

Spinal reflexes
– a basic posture control mechanism, 165
Spindles
– basic mechanisms of rhythmic activities, 481
– magnetic detection of sleep spindles, 123
Stationary boundary potentials, 187
Statistical evaluation of slow brain potentials, 413
Steady-state response
– event-related perturbation in 40 Hz SSR, 148
Stretch reflex
– CNV of direction and force movement preparation, 47
Subdural electrodes and spike detection, 379
Supplementary motor area
– brain mechanisms of voluntary motor commands, 282
Sympathetic skin response in normal subjects, 258

Temperature
– EEG changes during hypothermic surgery, 268
Temporal lobe
– endogenous ERPs from sphenoidal electrodes, 331
– spike detection with subdural electrodes, 379
Thalamus
– basic mechanisms of rhythmic activities, 481
Therapeutic implications
– functional explorations of the human epileptic brain, 296
Tibial nerve SEPs in healthy newborns, 453
Topographic component model
– representation of multichannel evoked P300, 540
Topographic mapping
– functional brain topography of mental work, 339
– intracranial topography of P3 ERP, 235
– linked ears reference and EEG topographic mapping, 373
Triphasic waves in hypothermia, 370
Tumors
– qEEG in patients with intracranial tumors, 13

Ulnar nerve
– diagnosis of carpal tunnel syndrome, 142

Validation
– automatic seizure detection, 317
Vegetative diseases
– sympathetic skin response in normal subjects, 258
Vestibular evoked potentials
– peripheral origin of chick's vestibular EPs, 362
Visual evoked potentials
– EPs during REM sleep reflect dreaming, 19
– event-related perturbation in 40 Hz SSR, 148
– inhibitory effects on monkey VEP, 440
Voluntary vs. involuntary motor acts, 351

Water immersion
– a basic posture control mechanism, 165
